Company

ASCONSIT: We Specialize in IT Security

As IT security experts, we advise both large and medium-sized companies on every aspect of identity and authorization management. We can support you in implementing proven solutions, as well as designing and developing custom security solutions for your company. In this increasingly digital age, you can benefit from our expertise in IT security and comprehensive knowledge of SAP.

About us

IT Security with Vision

ASCONSIT GmbH was founded in 2009 and since then has specialized in the implementation of sophisticated IT security environments for medium-sized and large companies. Today, a total of fifteen employees work at our company headquarters in Lüneburg, developing sophisticated and innovative IT solutions in a national and international context in close cooperation with our customers.
We implement our customers' requirements for comprehensive consulting and reliable solutions for identity and access management, homogenization and support with an optimal ratio of effort and result. We support our customers both in the implementation of proven standardized solutions and in the design and development of security solutions tailored to the individual needs of a company. We attach great importance to high-quality, sustainable solutions and use our more than 15 years of expertise to design IT security environments with foresight.

We would be delighted to give you the opportunity to get to know us!

Management

Arndt Spitzer (CEO)

As the founder and CEO of ASCONSIT GmbH, Arndt Spitzer is the strategic head of the organization. Developing individual software solutions was already a passion during his computer science studies at the University of Darmstadt – a calling to which he has remained true to this day. He started his own business at the age of 21, before his degree was even complete, working for well-known companies in the financial and insurance sectors in parallel to his studies. Later, he specialized in PKI software, cryptography, and security concepts. Working for SAP in Walldorf for many years, he gained experience with a range of software products and expertise in system architecture, software development and needs-based consulting. The creation of ASCONSIT GmbH in 2009 represented the realization of his long-term vision of a professional consultancy, allowing him to dedicate himself to the development and implementation of future-proof IT security solutions.

Team

Our strength lies in our team spirit!

Our work is driven by motivation and passion. A team spirit and positive working atmosphere are essential to our success and values.
