DSAG Technology Days 2020 in Mannheim

Meet us February 11-12

by ASCONSIT | Published on 28. January 2020

Deutschsprachige SAP® Anwendergruppe e.V.

"Digitalization has many sides. It's all about the right spin." This is the motto of this year's DSAG Technology Days in Mannheim.

In times of progressive digitalization, you can benefit from our expertise in the field of IT security and our comprehensive SAP expertise. The main topics in Mannheim are:

IdM UI5 Monitoring Dashboard

Today, access to applications in the IdM requires adaptable design regardless of the end device used and the location of processing. The interface developed by ASCONSIT on the basis of SAP UI5 provides user-friendly and intuitive designs to choose from. We offer solutions for mapping standard scenarios and individual processes.

Governance, Risk & Compliance (GRC)

Companies that succeed in intelligently networking all three areas of compliance, risk management and governance have the greatest business success. Learn more about SAP Access Control 12, the improved user experience, integration, process optimization, and wise integration of software solutions.

Enterprise Threat Detection

Cyber attacks on businesses and organisations continue to increase. SAP Enterprise Threat Detection (ETD) is used to monitor connected enterprise systems and applications. The primary goal is to identify, analyze, and neutralize cyber attacks in real time and prevent potential damage before it occurs. Be prepared and prepare your company for attacks and implement controls, alerts, and indicators that enable meaningful and effective evaluation and analysis.

Single Sign-On

Users gain secure access to applications and business processes across multiple systems with a single password. Learn about the possibilities offered by SAP Single Sign-On.

Arrange your appointment now and meet us in Mannheim:
