Fair for IT security

22. – 24. October 2024
Exhibition Centre Nuremberg

Experience the most important and latest security trends for identities, access and governance.

Find out about the pioneering all-in-one services in IAG management for the best user experience.

ASCONSIT will once again be at this year's it-sa Expo & Congress (Europe's leading trade fair for IT security). From October 22 to 24, 2024, we will be in the newly opened Hall 9 at Stand 9-142 in the [Messezentrum Nürnberg](#).

ASCONSIT Expert Topics

Modern Identity & Access Management (IAM) has become an indispensable part of companies' IT security strategy. The trend towards digitalization with location-independent access to company applications continues unabated and IT security in the company and employee productivity are more closely interlinked than ever. However, it is not uncommon for compromised login data and access authorizations to serve as a gateway into the company network.

This risk can be significantly reduced with the help of professional IAM. By providing centralized management of users and access rights, it lays an **important foundation for the protection of company data and its assets**. In addition, companies benefit from a sustainable streamlining and sharing of administrative processes through **privileged access management (PAM)** and the cross-organizational implementation of security standards. **Single sign-on (SSO)** increases security and is convenient. Companies benefit from the increased security, but also from the working hours that no longer have to be invested in password resets.

We pay particular attention to the realization of **IAM projects for SMEs**. ASCONSIT realizes the realization and implementation with manageable effort in agile project design.

One Identity's Unified Security Platform brings together previously separate processes for managing user permissions, privileged access, authentication and auditing, as well as analytics and compliance metrics. This **prevents identity fragmentation**, which is the cause of many security breaches in cyberspace. Using a unified identity security platform closes these gaps, reduces risk, increases efficiency and ensures governance across the organization.

ASCONSIT is a specialized technology partner in the implementation of **front-end and connector development** and offers a practical and **efficient mix of development, consulting, architecture, implementation and support services**. Taking into account the individual starting situation in your company (on-premise, cloud, hybrid IT landscape), we specialize in developing tailor-made solutions. Efficient use of resources and proactive risk management are just as important to us as taking company-specific compliance requirements into account.

ASCONSIT activities at it-sa

This year's focus is on the **solutions for efficient and modern IAM systems** that ASCONSIT has further developed.

Modern IAM interfaces offer optimum efficiency in use. We have further expanded the developments for **user-friendly IAM interfaces** shown in the last two years. In the ASCONSIT IAM frontend for One Identity's Identity Manager, we demonstrate which scenarios are included as standard and which can be customized according to individual processes and workflows. ASCONSIT is also **One Identity's exclusive Angular training partner**.

With FASTlane, we offer **migration support for a future-proof IAM** system. Currently, all SAP IdM users are facing the organization of the migration process of their IdM. With FASTlane, ASCONSIT has developed a tool that **automatically** determines and documents the path to migrate the product **in the right direction**. With ASCONSIT and FASTlane Migration Analyzer and the upcoming Migration Wizard, the transition to the most suitable successor technology is **efficient and economically** feasible.

Meet the **ASCONSIT team live** and be inspired by our high-quality services.

For **your free ticket**, simply fill out the form below or contact Markus Keller (E-Mail markus.keller@asconsit.com, Telefon [+49 4131 / 60 41 68 - 0](tel:+4941316041680)).
