Solutions

From practice for practice

ASCONSIT is one of the pioneers in IAM and web front-end development. With our solutions, we offer our customers more efficiency for their IAM systems through the clear visualization of the relevant KPIs. The development is a combination of user-friendliness, security and functionality. Our developments are practical additions for working with IAM solutions and linking them with solutions from other providers. We create environments that prove their added value to customers around the globe every day. Regardless of their size and sector, we provide our customers with the most suitable solution for their business model in line with the motto “from practice for practice”.

ASCONSIT SAP IdM FASTlane

Obtaining detailed clarity about the technical requirements associated with the replacement of SAP Identity Management is a central task with the given end of the maintenance period for the SAP product. Analyze the most cost-effective path to a future-proof successor solution for your SAP IdM now. Take advantage of our proven consulting and migration approach and the ASCONSIT FASTlane Migration Analyzer.
